- Malayalam - Read, Write & Speak

SUMMARY

A fresher Game Developer with a Bachelor's degree in Game Design and Development, seeking an entry-level role in the gaming industry. Passionate about advancing my skills, I specialize in game programming, level design, 2D/3D development and VR development with experience in Unity and C++. I've participated in multiple game jams, where I honed my abilities in rapid prototyping, problem-solving, and team collaboration. As a motivated and enthusiastic fresher, I'm eager to bring my expertise and creativity to a dynamic team and contribute to crafting exceptional gaming experiences.

PROJECTS

Retroid Space

2D Platformer Game

- Created the complete user interface for the 2D platformer game developed during a Game Jam.
- Designed interactive menus, HUD elements, and in-game UI to enhance player experience.
- Ensured visual consistency and user-friendly navigation within the game.

Slime Monsters

2D Platformer Game

- Developed multiple gameplay mechanics using Unity and C#.
- Implemented enemy AI behavior and level interactions to create engaging challenges for players.
- Collaborated with the team to complete the game within the Game Jam's 72-hour deadline.

INTERESTS
